- Real-Time Protection of your home and family
- Seamless integration with other smart devices and systems
- Easily control your security from anywhere

With ADT Command - You are always in control

Meet ADT Command - The Security System that is specially designed to provide real protection for you and your family that is really smart and really simple to control from your home or on the go. The ADT Mobile App extends the capabilities of your ADT Command Platform, giving you remote access and control of your smart security system from virtually anywhere. At a glance, on your Android or Apple iOS smartphone, you can turn on lights, view your video cameras in real time, adjust your thermostat to save energy. Imagine being able to automate your system so that you arrive to a well-lit and comfortable home, becoming completely programmable to your schedule and geo-fencing technologies. This is just a small introduction to the convenience ADT Command can bring for you.

ADT Command can work with all of your favorite devices, such a ZWave, LiftMaster, Google Home and Amazon Alexa for integrated voice controls. Some of the functions that you are able to control with Alexa and ADT Command are arming and disarming your system, controlling your lights, locks and thermostats, and even more features.

*Optional Secondary 7" Wireless Touchscreen Panel

ADT Command features the latest and most secure network for your security. Have confidence knowing that no matter where you are viewing your home and security features from that ADT Command has Advanced Two-Way Encryption Technology. Our highly trained smart home technicians will install your system and help integrate your Command system and the ADT app. We'll test everything to ensure it's working properly and guide you through how your new smart security and home automation system works. You'll be ready to use it from day one.
